

Quality and safety of the environment / 1st cycle studies (Bachelor)

Faculty of Chemistry:

No.	Course unit	Semester
1	General chemistry	summer
2	Foreign language course	winter
3	Elements of physics and physical aspects of environmental hazards	winter
4	Electrochemistry of materials	winter
5	Instrumental methods in environmental analysis	summer
6	Innovation for the environment	winter
7	Functional nanomaterials in the environment protection	summer
8	Nanotechnology in the environment	winter
9	Biodegradation and recycling of the polymeric materials	summer
10	Nanotechnology	winter
